# PROJECTS

## Reservation App

### Technologies: React, Router, Axios, CSS, Bootstrap

- User Interface: Designed and implemented a dynamic and responsive user interface using React. Leveraged React components to create a modular and maintainable codebase.
- Routing: Implemented React Router to manage navigation between different views, including the dashboard, version history, and individual document details.

## Dash Board (Admin Panel)

### Technologies: React , Router, Bootstrap , Material UI-icons ,Rechart

- Dynamic Data Visualization: Implemented interactive charts and graphs using D3.js, allowing users to visualize and analyze complex data sets in real time.. Routing and Navigation: Integrated React Router for seamless navigation between different sections of the dashboard, such as analytics, reports, and user settings.

## Food App project

- User Interface: Designed and implemented a responsive frontend using React and Bootstrap, providing users with a clean and intuitive interface for exploring recipes, meal plans, and grocery lists.
- Routing: Implemented React Router for smooth navigation between different sections of the app, such as recipe browsing, meal planning, and user profiles.
- Styling: Applied CSS and Bootstrap for consistent and responsive design, enhancing overall user experience across various devices.
- Server and API Development: Built a RESTful API using Node.js and Express to manage user data, recipes, meal plans, and grocery lists. Implemented endpoints for CRUD operations and user authentication.
- Database Management: Utilized MongoDB for persistent storage of user data and application content, including recipes and meal plans. Designed schemas to handle complex data relationships and queries.
- Authentication: Implemented user authentication and authorization using JWT (JSON Web Tokens), ensuring secure access to user-specific data and functionalities.
